Why Lease

- 1. Leasing requires NO down-payment and eliminates the need for compensating balances.**
- 2. Covers All Equipment Costs: NO need to obtain financing anywhere else.**
- 3. Conserve Working Capital: Cash is not tied-up in equipment. It is free for income producing investments.**
- 4. Preserve Bank Lines: Credit remains available for other needs.**
- 5. Save On Taxes: You save initially because leasing costs come out of before-tax dollars, not after-tax profits.**
- 6. Simplify Accounting and Depreciation Records: Leasing costs are tax deductible.**
- 7. Avoid Rapid Obsolescence: The most modern equipment is always available and updating is easy so you can always be at your competitive best.**
- 8. Fight Inflation: Leasing costs remain the same no matter how much prices rise. You pay for today's needs with tomorrow's dollars.**
- 9. Expand, Replace, Equipment Sooner: Since no capital investment is involved, expansion and replacement of equipment can happen more quickly.**
